

In today's hectic, stressful world people like to have peace of mind that they can pick up their phone and not have to be harrassed by a telemarketer every day. The New Jersey Do not call option has been a huge succcess as I know many people who have sined up and in my opinion a God sent that the phone is not constantly ringing with people you have no interest in speaking to. If you notice more and more phones are being sold with the caller id option already installed that is a sad statement as to the level of harrassment Americans are feeling on a day to day basis.

Thank you.
